Professional Summary

Data-driven Computer Science undergraduate skilled in **SQL, data analysis, and visualization**, with experience in extracting insights from structured datasets and building scalable data pipelines. Proficient in **data cleaning, exploratory analysis, and automation using Python and Excel**, with a strong focus on translating business requirements into actionable insights.

Education

- **Indian Institute of Information Technology, Sri City** 2023 – Present
B.Tech in Computer Science and Engineering CGPA: 8.16/10

Experience

- **Software Engineering Intern – Infosys Springboard** Feb 2026 – Apr 2026
Spring Boot, MySQL, Data Analysis
 - Gathered and translated **business requirements** into system workflows and database structures.
 - Designed and optimized **SQL queries** for efficient data retrieval and reporting.
 - Performed **data cleaning and validation** to ensure consistency across modules.
 - Extracted and analyzed system data to derive **actionable insights**.
 - Automated repetitive backend processes and data flows to improve efficiency.
 - Collaborated with stakeholders to ensure **data-driven decisions** were implemented.

Projects

- **Cloud Monitoring Pipeline** Sep 2025 – Dec 2025
AWS Lambda, CloudWatch, Python
 - Built a pipeline to **collect, process, and analyze log data in real-time**.
 - Implemented automated log parsing and anomaly detection for **data-driven alerts**.
 - Designed monitoring metrics to identify system performance trends.
 - Improved reliability by detecting recurring failure patterns in data.
- **Prioritized Semi-Supervised Deep Embedded Clustering** Dec 2025 – Present
Python, PyTorch
 - Analyzed datasets to uncover **hidden patterns and relationships**.
 - Applied data preprocessing, feature engineering, and optimization techniques.
 - Improved clustering results using **data-driven constraint strategies**.
 - Generated insights from unlabeled data for better decision-making.
- **Hyperspectral Image Classification (GSC-ViT)** Jan 2026 – Present
Deep Learning, Data Processing
 - Processed high-dimensional datasets for classification tasks.
 - Built pipelines for **data preprocessing and feature extraction**.
 - Applied machine learning techniques to derive insights from complex data.

Skills

- **Languages:** Python, Java, SQL, JavaScript
- **Data & Analytics:** SQL, Data Cleaning, EDA, Data Exploration
- **Excel / Sheets:** Pivot Tables, Lookups, Basic Automation
- **Visualization Tools:** Tableau / Power BI (Basic)
- **Backend:** Node.js, Express.js, Spring Boot, REST APIs
- **Cloud & Tools:** AWS (Lambda, CloudWatch), Git, Docker
- **Core CS:** DBMS, Data Structures, Problem Solving

Positions of Responsibility

- **Contest Manager – Gradient (Programming Club, IIITS)** 2025 – Present
Managed coding contests and coordinated events ensuring smooth execution.

Strengths

- Strong **data inquisitiveness** and analytical thinking
- Solved 600+ Data Structures problems across platforms
- Strong debugging and problem-solving skills
- Ability to translate raw data into actionable insights
